

Minnesota's Environmental Review Program

EQB Environmental Review Program Administrators

Jesse Krzenski & Kayla Walsh

- Minnesota's Environmental Review Program
- Projects update
- Continuous Improvement
- This year's workplan

Who is the Environmental Quality Board?

- EQB is an 18-member board made up of state agency commissioners and public members
- Staff provides coordination and support
- Key staff role: Technical assistance for environmental review

Promotes strategic interaction of multiple state agencies

Serves as forum for public to engage in environmental decision-making

Stewards Minnesota environmental review process

Types of review

Environmental Assessment Worksheet
(EAW)

Environmental Impact Statement
(EIS)

Alternative Urban Areawide Review
(AUAR)

Minnesota Rules chapter 4410

- Defined purpose and objectives
- When review is required
- Exemptions
- Types of review
- Procedures for review
- Decision criteria

Minnesota's Environmental Review Program

Minnesota Statute 116C

Created the Environmental Quality Board

Minnesota Statute 116D

Minnesota Environmental Policy Act gives the Board authority to adopt rules

Minnesota Rules Chapter 4410

Implements the Environmental Review (ER) Program established by statute

EQB

- Monitor program effectiveness
- Help understand the rules
- Create guidance

Project Proposer

- Provide project details

Responsible Governmental Unit

- Implement procedures
- Prepare environmental documents
- Decision maker

Public

- Review environmental documents
- Provide comments

Why we do Environmental Review

- Regulatory program that implements federal and/or state policy
- Applies to certain future projects
- Public disclosure of all potential environmental effects in one document
- Informs government approvals

General Environmental Review characteristics

- Required public process
- Broader in scope than permitting (includes all potential environmental effects in one document)
- Alternative review option
- Appeals directly to courts
- Moratorium on final approvals and construction
- Projects do not pass or fail environmental review – it's not an approval process

Examples of benefits

Provides information...

- during project design phase
- beyond individual permit compliance
- for public participation in project approvals

When is review required? – Mandatory Categories

Mandatory
Category

Discretionary
Review

Agriculture

Commercial

Electric
Generation

Forestry, Land
Use

Industrial

Residential

Transportation

Waste
Management

Public request for review: Petition process

- Formalized process to request preparation of an Environmental Assessment Worksheet
 - Requires material evidence of potential environmental effects
 - Must be signed by at least 100 individuals who live or own property in Minnesota
- Petition submitted to EQB
- EQB designates RGU

Types of review

Environmental Assessment Worksheet
(EAW)

Environmental Impact Statement
(EIS)

Alternative Urban Areawide Review
(AUAR)

EAW Content:

- 13-page worksheet
- 22 standardized questions
- Discloses information necessary to determine the need for an EIS/the potential for significant environmental effects

<https://www.eqb.state.mn.us/content/eaw-process>

ENVIRONMENTAL ASSESSMENT WORKSHEET

This Environmental Assessment Worksheet (EAW) form and EAW Guidelines are available at the Environmental Quality Board's website at:

<http://www.eqb.state.mn.us/EnvRevGuidanceDocuments.htm>. The EAW form provides information about a project that may have the potential for significant environmental effects. The EAW Guidelines provide additional detail and resources for completing the EAW form.

Cumulative potential effects can either be addressed under each applicable EAW Item, or can be addresses collectively under EAW Item 19.

Note to reviewers: Comments must be submitted to the RGU during the 30-day comment period following notice of the EAW in the *EQB Monitor*. Comments should address the accuracy and completeness of information, potential impacts that warrant further investigation and the need for an EIS.

1. Project title:

2. Proposer:

Contact person:
Title:
Address:
City, State, ZIP:
Phone:
Fax:

4. Reason for EAW Preparation: (check one)

Required:

- EIS Scoping
 Mandatory EAW

Discretionary:

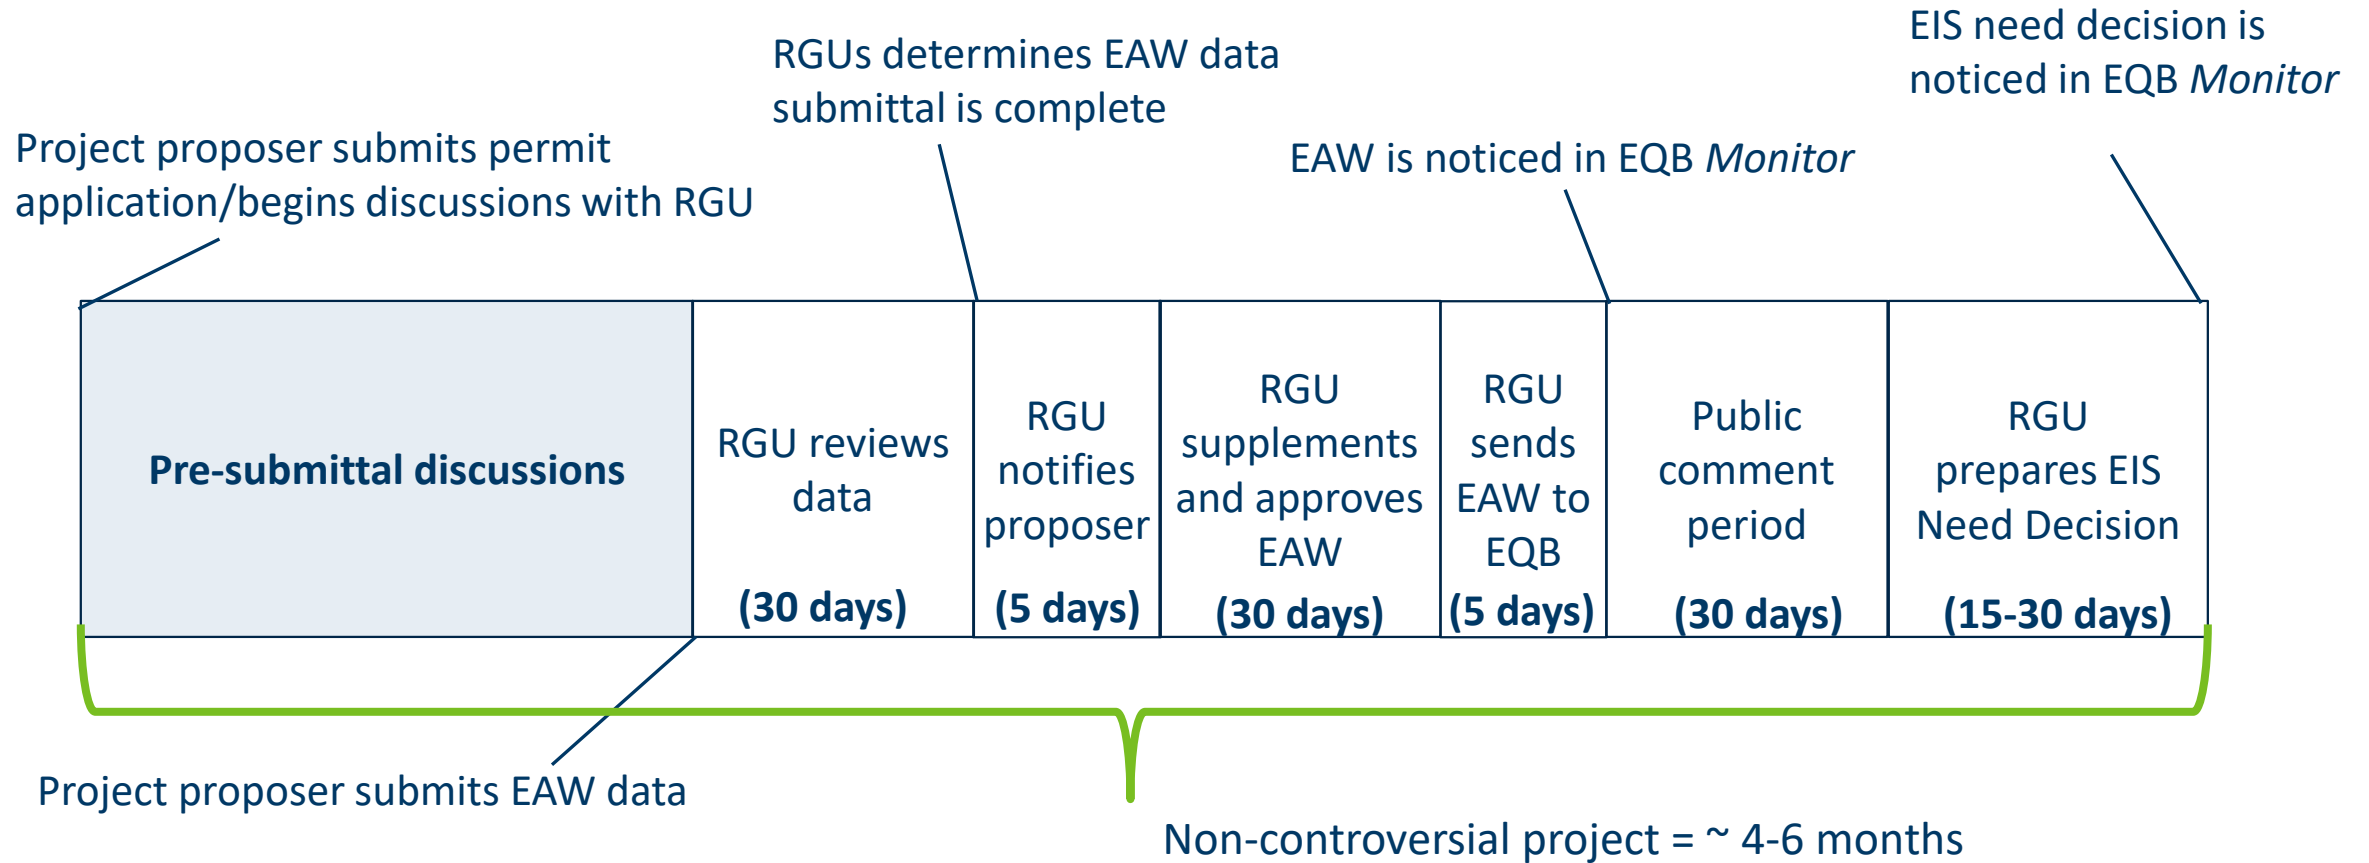

- Citizen petition
 RGU discretion
 Proposer initiated

If EAW or EIS is mandatory give EQB rule category subpart number(s) and name(s):

5. Project Location:

County:
City/Township:
PLS Location (¼, ¼, Section, Township, Range):
Watershed (81 major watershed scale):
GPS Coordinates:
Tax Parcel Number:

EAW process timeline

* “Day” – 15 days or less = business day (excludes weekends and holidays when counting) *

An EAW determines if an EIS is needed: “EIS need decision”

- Type, extent, and reversibility
- Cumulative potential effects
- The extent to which the environmental effects are subject to mitigation
- The extent to which environmental effects can be anticipated and controlled

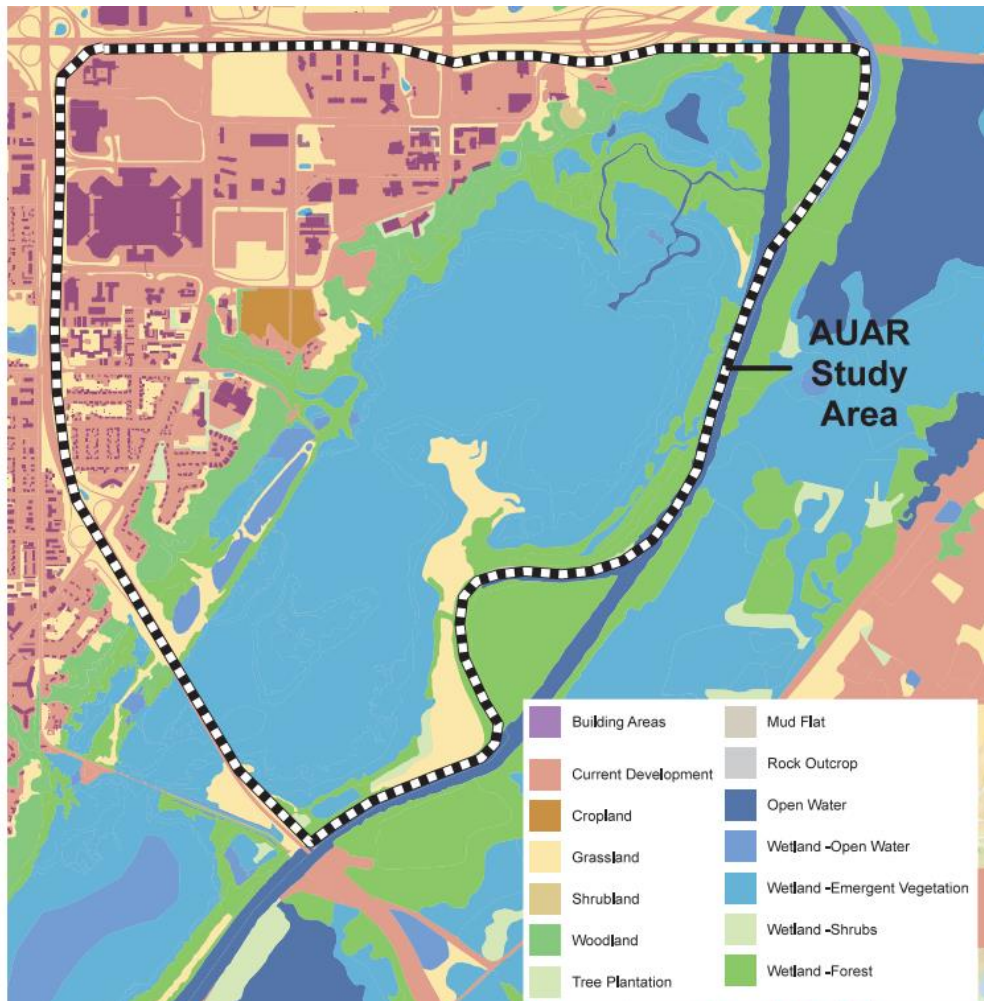

Environmental Impact Statement (EIS)

- More in-depth
- Includes alternatives
- Environmental, economic & social
- Mitigation of impacts

Alternative Urban Areawide Review (AUAR)

- Used instead of an individual project EAW or EIS
- Defined geographic area
- 5-year expiration; can be updated
- Limited to residential, commercial, warehousing, and light industrial development and associated infrastructure

Project updates

Active Environmental Review Projects

EQB Monitor

- Environmental review notices
- Public comment periods
- Public meetings
- Records of decisions

EQB Website

- **NEW:** Online services
- Database
- Climate guidance and information and GHG emission calculations in EAW form

To sign up: <https://bit.ly/3efNF1p>

EQB Monitor submission service

- Need an account
- Project description
- Authorized users/verify internal processes are complete
- Active projects
- Work in progress

Updated in May of 2023 for publishing all required ER notices

Projects noticed in the Monitor now will create project pages within the ER database

Environmental Review Database

- <https://www.eqb.state.mn.us/content/environmental-review-projects-database>
- Database will house all environmental review projects and associated ER documents from May 2023 onward (currently does not include petitions)

The screenshot shows the website for the Minnesota Environmental Quality Board's Environmental Review Projects Database. At the top left is the logo for the Minnesota Environmental Quality Board, featuring a stylized 'm' and 'n' followed by the text 'MINNESOTA ENVIRONMENTAL QUALITY BOARD'. Below the logo is the title 'Environmental Review Projects Database' in a large, bold, blue font. Underneath the title is a section titled 'Search for Project Information'. This section contains a paragraph of text: 'All environmental review projects since May 2023, can be found below. To refine this list, enter information in one or more of the following search bars. Results of your search will show in both the map and the project list below.' Below this text are several search input fields: 'Project name', 'Project city/township', 'Type of Responsible Governmental Unit' (a dropdown menu), 'Project county', 'Mandatory category', and 'Select Environmental Review Process' (a dropdown menu). At the bottom right of the search area is a checkbox labeled 'Open for public comment'.

Grindstone Dam Removal Project

County Located in:	Pine
Latitude:	46.02272
Longitude:	-92.94771
Responsible Governmental Unit:	Minnesota Department of Natural Resources

Project description

The Minnesota Department of Natural Resources (DNR) is seeking public comments on the scoping documents for a State Environmental Impact Statement (EIS). The EIS will describe the potential environmental effects of a proposed dam removal project in the Hinckley area. The scoping documents provide information about the topics that are proposed to be included in the State EIS for the proposed project. The DNR proposes to remove the dam on the Grindstone River in Hinckley and restore connectivity to the river channel. This would result in the permanent removal of the 26.6-acre Grindstone Reservoir, which is a public water basin. The removal is proposed because the dam is in poor condition, it presents a safety hazard, and it is a barrier to passage of fish and other aquatic wildlife on the river. The dam also does not allow for natural sediment transport and natural stream features or habitat diversity.

MEPA Turns 50

<https://www.eqb.state.mn.us/content/mepa-turns-50-0>

MEPA Turns 50

The Environmental Quality Board is pleased to announce the publication of MEPA TURNS 50, by Stephanie Hemphill. This article celebrates and reflects on the 50th anniversary of the Minnesota Environmental Policy Act, highlights the attributes of MEPA and environmental review, evaluates its shortcomings, and looks ahead to the next fifty years.

Why Continuous Improvement?

By providing a framework for continuous improvement, the Environmental Review Program will be able to responsively adapt to the changing needs of our environment.

An Effective ER Program should have:

Continuous improvement process

Solicit ideas for improvements

Review ideas

Evaluate ideas based on program effectiveness

Implementation planning

Subcommittee review

Board directs staff to implement selected projects.

Key projects

Evaluate decision
criteria: type, extent,
reversibility

New BMPs
and training

Work plan
goals

A large white circle containing the text "Work plan goals" and a blue icon of a clipboard with a checklist.

Type, extent, and reversibility

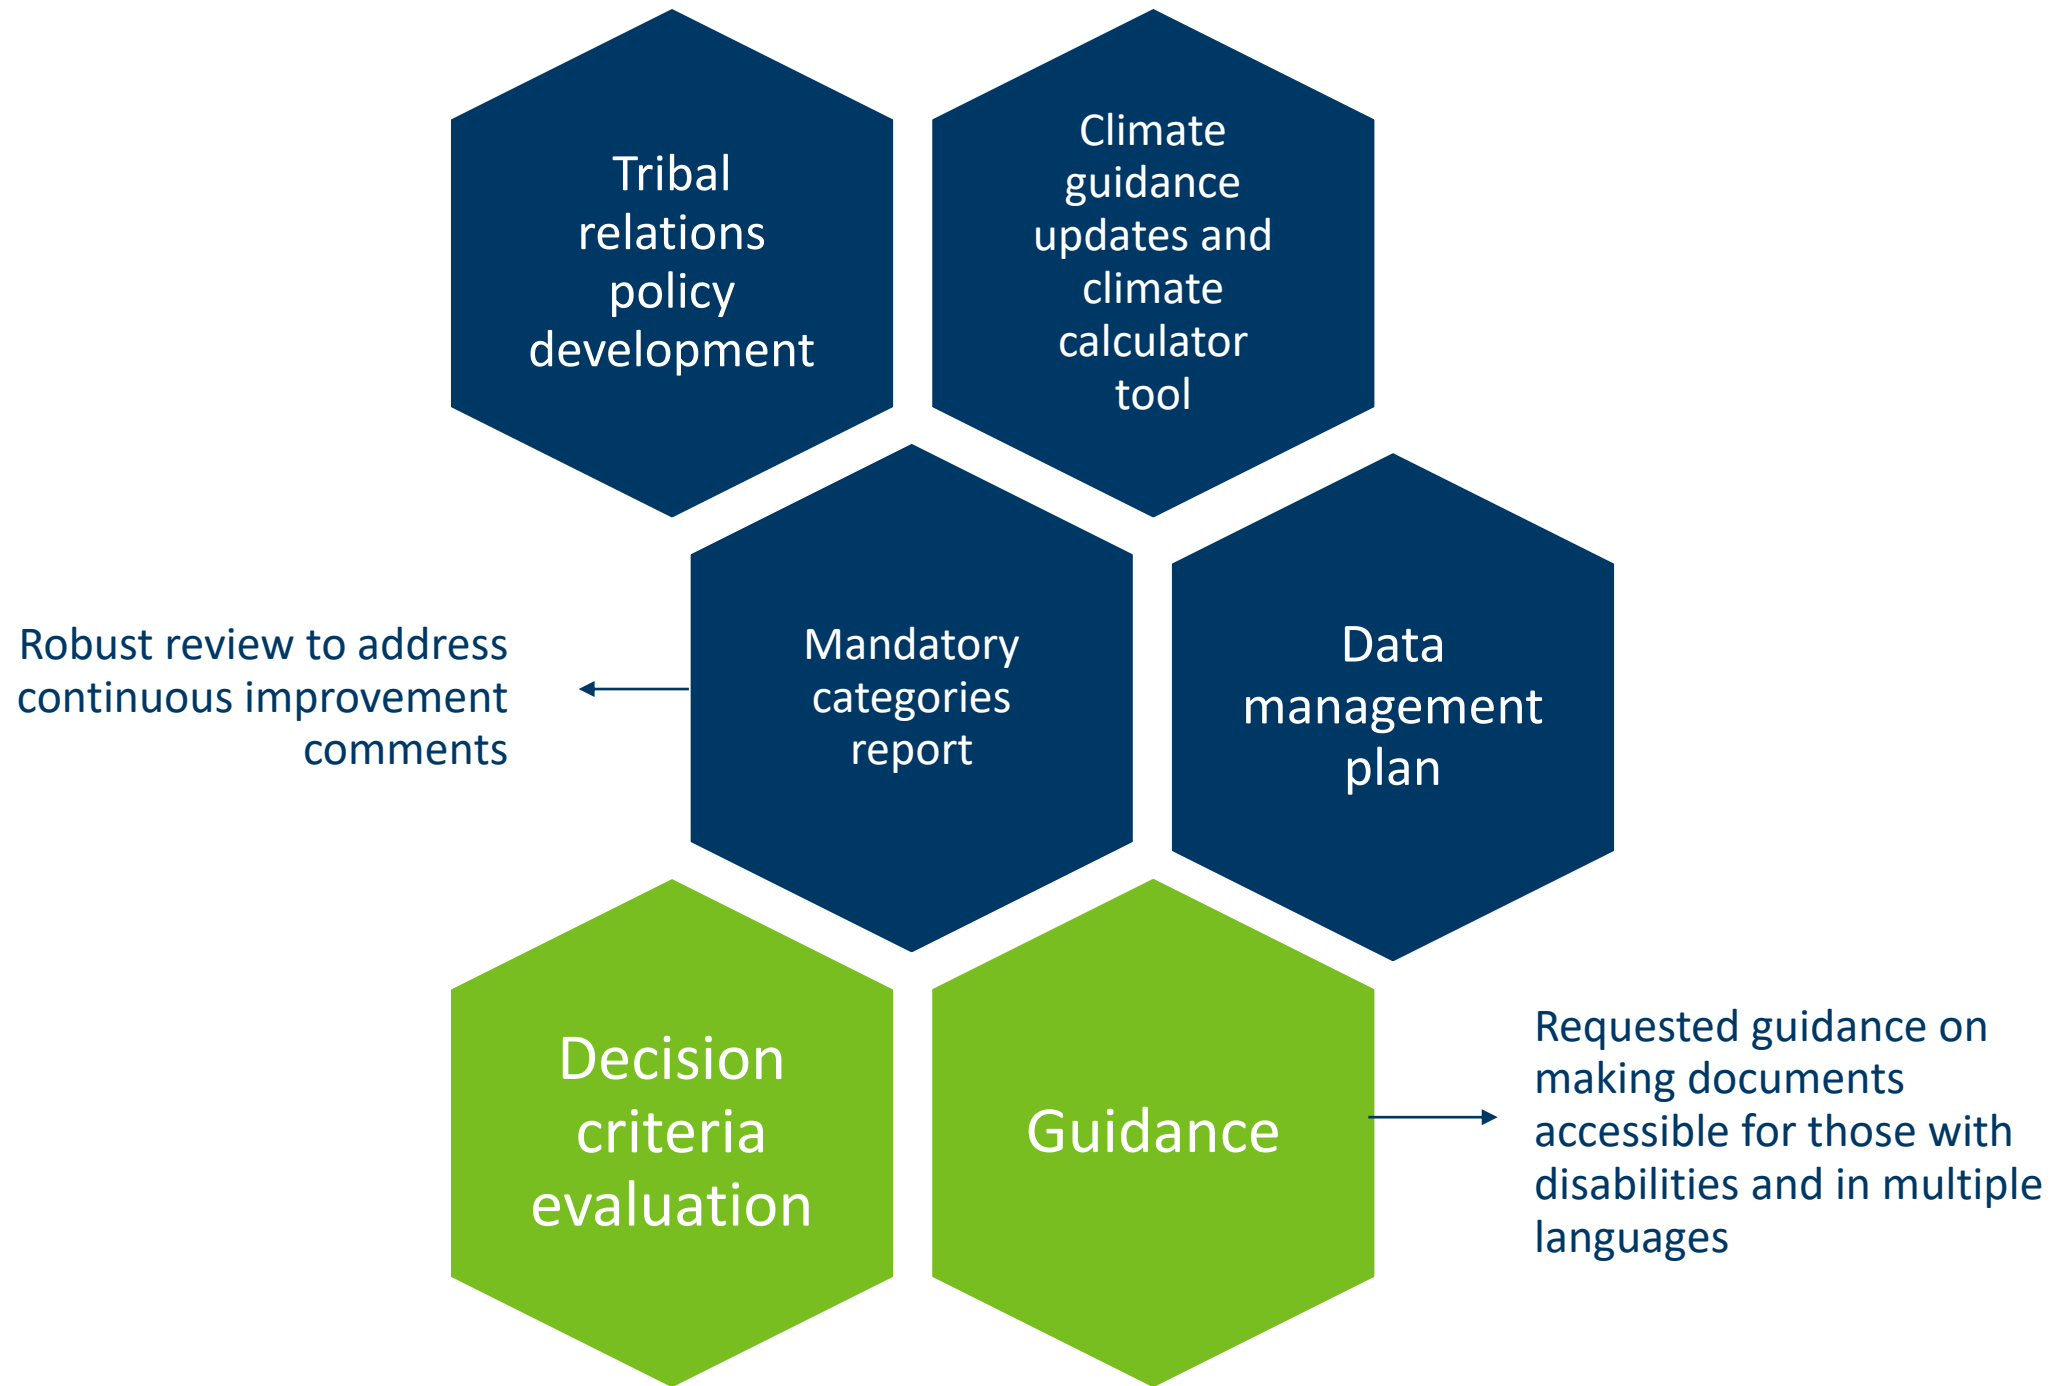

Cumulative potential effects

The extent to which the environmental effects are subject to mitigation

The extent to which environmental effects can be anticipated and controlled

This year's workplan

Mandatory Categories Report

- Assess history of categories and their thresholds
- Engagement and white papers on certain categories
- Opportunity to incorporate life cycle and cumulative impacts
- Recommend changes to individual categories or broader re-structuring
- High Priority (legislative mandate)
- RGU and Tech Rep help; subject matter experts per mandatory category
- Publish draft report December 2024

Upcoming engagement opportunities

Decision criteria evaluation & Mandatory Categories Report

- Online feedback via engagement HQ coming in early 2024.
- Think about experiences in using decision criteria and using thresholds in any mandatory categories.

- Updated climate guidance
- Re-organize and update existing guidance
- New best management practices- what would be most helpful to you?
 - Notifications best practices?
 - How to work with Tribes early and often?
 - How to evaluate petitions?

Questions?
